Commissioner for Patents

The amendment to claim 12 is considered to be non-responsive because it recites limitations placing the claims into a different statutory class. Initially, the battery structure was nominal, but limitations such as 'coated on the collector' changes it to a battery claim, for class 429. Such a claim would have been restricted had it been presented originally. It is noted that applicant may admit that the language added represents old and known features- and that the patentability of claim 12 resides in the initial graphite material limitations previously in the claims, in which case the holding of non-responsiveness will be withdrawn.

Any inquiry concerning this communication should be directed to examiner Hendrickson at telephone number (517) 272-1351.

Stuart Hendrickson
